

ASSURANT®

Environmental Policy

Assurant recognises that every organisation has a responsibility to the environment and is committed to establishing environmental management for its warehousing and distribution. We will strive to minimise any disturbances to the local and global environment.

Having reviewed specifically our UK warehousing and distribution business, activities and services, our significant environmental impacts are associated with disposal of waste, energy use, dangerous goods handling, fuel and emissions for transportation. We are committed to reducing these negative impacts as far as possible and will:

- Comply with all relevant legislation & regulations, and regularly review for continual improvement
- Commit to the protection of the environment including prevention of pollution
- Commit to ongoing sustainable management of our environmental impacts within our facilities and operations and acting to reduce our rates of emissions, energy and waste
- Consider the best use of raw materials, using recycled / recyclable products where applicable.
- Minimise waste and maximise material re-use and recycling.
- Promote environmental awareness at all levels of the company and encourage appropriate actions by all staff.
- Liaise with suppliers, customers and contractors to improve Environmental Management at all levels of the supply chain.
- Secure and maintain ISO14001 certification including the setting of Environmental objectives and targets

To achieve this policy we will ensure that our employees have the necessary training, information, systems and authority to minimise the effects of our warehousing and distribution operation on the environment. This policy is fully supported by the senior management team at Assurant and will be periodically reviewed.

Andrew Sheard, Director Repair & Service Europe:
